

GOOD NEIGHBOR PLUS PROGRAM
COOL SEASON TURF

Good Neighbor Round 1 - *March*

Our first visit promotes control of existing weeds and enhances lawn color. Application consists of pre-emergent for crabgrass control, broadleaf weed control, as well as a light fertilizer to help give a greener turf.

Good Neighbor Round 2 - *April*

Our second application consists of pre-emergent for crabgrass control, broadleaf weed control, and a light fertilizer.

Good Neighbor Round 3 - *May*

Our third visit consists of broadleaf weed control.

Good Neighbor Round 4 - *June*

Our fourth round is especially important because we apply a lawn fungicide to control lawn diseases such as Brown Patch and Dollar Spot. Included in this treatment is insect control and additional weed control.

Good Neighbor Round 5 - *July*

The fifth round continues our preventative treatment for lawn diseases. Included in this treatment is additional weed control.

Good Neighbor Round 6 - *August*

The sixth round consists of broadleaf weed control.

Good Neighbor Round 7 - *September*

Round 7 is important for the continued growth and color of your cool season turf. On this round we apply a complete fertilizer.

Good Neighbor Round 8 - *October*

This round continues our treatment of post emergent broadleaf and grassy weeds.

Good Neighbor Round 9 - *November*

During this round we help prepare your lawn for winter by applying post-emergent weed control to control the last remaining summer and fall weeds.

Good Neighbor Round 10 - *December*

Round 10 is our final round of the year. We apply post emergent weed control to control winter annuals. We also apply fertilizer.
